150034 08/22/2015 Terror Tunnels

We tell you every week that the mainline media and the herd are running in the wrong direction. When it comes to virtually every aspect of society in this country, so is our government. In this week's boralogue, John shows the need for reform in the economy, government, law, constitutional rights, education, taxes, and border security. Societies go through cycles and a time comes when reform is needed. We either reform and move on or dictators step in and take over. Can we reform before our economy collapses or terrorists strike our cities?

How realistic is an ISIS terror attack in the United States? We are joined this week by Dan Gordon (**www.dayofthedeadlibertyedition.com**), Captain in the Israel Defense Forces, Hollywood screenwriter, and author of the new book Day of the Dead, Book One: Gaza.

He recounts his experience in last year's Hamas / Israel Terror Tunnel War and outlines Hamas's terrifying plot to kidnap women and children through underground tunnels beneath the Israel-Gaza border.

The same tunnel system can be found under the border between Mexico and the United States, in cities like El Paso, Tucson, and San Diego. ISIS is very likely planning to use these tunnels to infiltrate America. San Diego could suffer a debilitating terrorist attacks against military installations and public arenas. ISIS has the means, desire, and training to pull this off.

The United States military has conceded that the battlefields of the future will be in American cities.

Rounding out the program, John discusses a recent intelligence report that states the Obama administration entered into nuclear discussions with Iran as early as Mahmoud Ahmadinejad's rule, far earlier than we were told. He also details yet another example of a life ruined by civil asset forfeiture

Benjamin Franklin, speaking at the conclusion of the Constitutional Convention in 1787:

> In these sentiments, sir, I agree to this Constitution, with all its faults, if they are such; because I think a general government necessary for us, and there is no form of government, but what may be a blessing to the people if well administered; and believe further, that this is likely to be well administered for a course of years, and can only end in despotism, as other forms have done before it, when the people shall become so corrupted as to need despotic government, being incapable of any other. I doubt, too, whether any other Convention we can obtain may be able to make a better Constitution.
